NEUROIMMUNOL. 59:91-101(1995).

-!- FUNCTION: RECEPTOR FOR THE NEUROPEPTIDE NOCIPEPTIN/ORPHANIN FO.

HAS A POTENTIAL ROLE IN MODULATING A NUMBER OF BRAIN FUNCTIONS,

INCLUDING INSTINCTIVE BEHAVIORS AND EMOTIONS. THE ACTIVITY OF

THIS RECEPTOR IS MEDIATED BY G PROTEINS WHICH INHIBITS ADENILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              PAN Y.-X., CHENG J., XU J., ROSSI G., JACOBSON E., RXAN-MORO J., RSOOKS A.L., DEAN G.E., STANDIFER K.M., PASTERNAK G.W.; "Cloning and functional characterization through antisense mapping a kappa 3-related opioid receptor.";

Mean 48.857; Variance 122.078; scale 0.400 Statistics:

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

### ALIGNMENTS

RESULT 1 HUMOPRK1A LOCUS	HUMOPRKIA 455 bp DNA PRI 07-JAN-1995
DEFINITION	Homo sapiens (clone hSR4-1) kappa opioid receptor (OPRK1) gene,
ACCESSION	complete exon. L26079
VERSION	L26079.1 GI:416143
KEYWORDS	OPRK1 gene; kappa opioid receptor.
SOURCE	Homo sapiens (tissue library: Stratagene 946203; lambda) male
	placenta DNA.
ORGANISM	Homo sapiens
	Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Mammalia;

Application US/08514451A

Patent No. 5837809

GENERAL INFORMATION:
APPLICANT: Bunzow, James R.
APPLICANT: Grandy, David K.
APPLICANT: Grandy, David K.
APPLICANT: Reinscheid, Rainer K.
APPLICANT: Monsma, Frederick J.
TILLE OF INVENTION: A NOVEL MAMMALIAN OPICID
TITLE OF INVENTION: RESPECT LIGAND AND USES
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
                                                                                                 REFERENCE/DOCKET NUMBER: 899-40006/WDN
TELECOMMUNICATION INFORMATION:
TELEPHONE: (503) 226-7391
TELEFAX: (503) 228-9446
INFORMATION FOR SEQ ID NO: 3:
SEQUENCE CHARACTERISTICS:
LENGTH: 1452 base pairs
TYPE: nucleic acid
STRANDEDNESS: single
TOPOLOGY: linear
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ADDRESSE: Klarquist Sparkman Campbell ADDRESSE: Leigh & Whinston LLP STREET: 121 S.W.
